

# **Caratacus Module Errata & Clarifications**

**February, 2008**

## **Components**

### **Counters**

There are 60 counters provided with the module. Corrections and additions to the counters include:

- The Briton MI should be BI instead
- Togodumnus counter is missing. Use any TC from Caesar/Gaul substituting the following ratings: Order/Line Range is 4/7; Initiative is 4; Charisma is 2
- Cnaeus Sentius (commander of the Batavians) should have the following ratings: Command Range is 3; Initiative is 3; Line Command is 1; Charisma is 1; Strategy is 6. He is not a Cavalry commander, but the leader of the Batavians.

The Briton army contains the following units:

- 2 Overall Commanders (Caratacus and Togodumnus)
- 3 Subordinate commanders (Taximagulus, Cingetorix, and Segovax chiefs of the Trinovantes, Atrebatas and Cantii, respectively)
- 30 LI with 30 CH
- 20 BI (the MI counters)
- 4 LC

Not all of the counters included in the module are used in the battles. There are 8 extra Briton BI (masquerading as MI, to be sure). Please use only 20 of these (you could always use the extras to alter play balance. Better more than too few). There is an extra Briton LI and CH, although including them is not exactly going to alter the game to any great extent. The extra CH counters are used for the extra Brit LI, which always used chariots to get around town.

Since the original publication of the module, GMT has added 40 counters. This set includes:

- 20 Briton BI to replace the 20 Briton MI from the original counter set
- Togodumnus
- Cn. Sentius (ignore the Cav designation on the counter)
- 4 Batavian MI and 2 Batavian LI
- 12 Testudo/Harass & Disperse Markers

## **Applicable Errata for Caesar: Conquest of Gaul**

Ignore this section when using the Caesar: Conquest of Gaul 2<sup>nd</sup> Edition rules.

## **The Battles**

### **Battle of the Medway**

### **British Forces**

As noted above, add the Briton CH (23-30) to the Briton force pool

### **Roman Forces**

- The 4 Batavian MI and 2 Batavian LI from the extra counters sheet replace the 4 Nametes BI and 2 Nametes LI
- Only three Baelaric Singers are used (one with each Roman legion)

### **Roman Reinforcements**

“Nametes” should be “Nametes/Batavians”

### **Caratacus’ Last Stand**

#### **Testudo**

Testudo markers are provided in the extra counters sheet

### **Movement Costs Chart**

The Batavian MI should use the BI/LI column
