## Reinforcements: Allied

1. 1x Sub (BR) in Scapa Flow  
2. 2x LaGG-3 [72 SAP] at Murmansk

## Special Rules:

1. The Allied Special Condition is ‘FAA Strike’ regardless of the Allied chit drawn. The primary target is either Kirkenes (if this chit is A-T) or Banak (if U-Z). Allies must launch air strikes on the primary target and either Kirkenes, Narvik, Tromso, or Banak prior to Day 10 or the game results in German Victory. Treat Axis ‘Atlantic Breakout’ Special Condition as ‘None.’  
2. Use the *Norfolk* counter to represent *HMS Shropshire*. No other ship is required for Patrol White [5.1.9].  
3. Do not count Hurricanes as Interceptors at Murmansk in this Operation.  
4. Except 4x DDs (and the Sub if the Axis Special Condition is ‘Reinforcements’), German ships starting in Kirkenes may not move except to fulfill a Special Condition. Soviet Wolfpack(s) may not move.  
5. Soviet surface ships may not combine with another Allied TF. Once they return to port, they may not leave again.  
6. A TF of at least 2 units, including at least 1 cruiser (‘Force K’) must move to Barentsburg and Bear Island. Score +1 VP the first time Force K expends 1 MP in each of these hexes; deduct 1 VP per hex if it does not.  
7. *CM Adventure* scores 1 additional VP as if it is a loaded MX if it enters Murmansk or is sunk [2.1.1].

## Historical Background:

Motivated to somehow assist his new Soviet allies in the face of the German BARBAROSSA onslaught, Churchill ordered the Home Fleet to strike at Axis forces in northern Norway. The Royal Navy responded by mounting a Fleet Air Arm strike on the ports of Petsamo, Kirkenes, and Tromso, but accomplished little in exchange for heavy casualties (described in the 7.2.3 Example of Play). Force K under RADM Philip Vian investigated settlements on Spitzbergen to ensure they were not under German control and destroyed a valuable German weather station on Bear Island, while *HMS Adventure* delivered a cargo of magnetic mines to Russia.

**Historical Background:**

With *Tirpitz* under repair and most of Luftflotte 5’s bombers called away to oppose the landings in North Africa, the British determined to sail the unloaded ships from Arkhangelsk before ice closed the White Sea. 29 ships sailed in QP-15 on 17 November, one missing departure with mechanical problems and one running aground. Eight U-boats lay in wait and *Hipper* was ready to intercept, but remained in port when air reconnaissance failed to locate the convoy. Three days at sea the convoy was scattered by a gale, and the German subs succeeded in sinking only two freighters before the rest reached safety. Two Soviet destroyers of the local escort were less fortunate; *Baku*’s hull cracked and part of her superstructure was torn away before she struggled into Murmansk, while *Sokrushitelny* broke in two and fouled in the storm.
